Hardware used by Library (Radio module 433MHz : RFM98 or equivalent like SX1278)
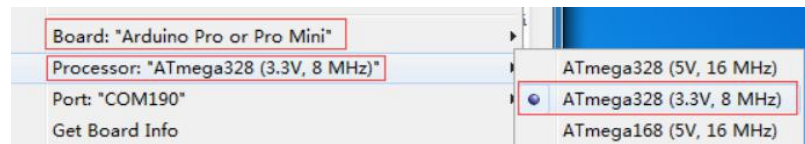

1) Arduino shield (new shield)
Pin used: SPI (D10,D11,D12,D13), D9 (reset), D2 (interrupt) (not used by library)

2) Maduino (LoRa module + Arduino pro mini 3.3V 8MHz (ATmega328))

Program using:

3) Remote control (LoRa module + Arduino micro(Lylipad) (Atmega32u4 ,3.3V 8 MHz))

Powerd just by push button.

Program using:
